Getting Started

Welcome to your Filey sample drive

Explore

Open Documents for a resume, a moving checklist, and two receipts. Photos contains landscape and portrait images. Travel has a two-page itinerary and a reservation inside a nested folder.

Preview a file

Tap a PDF or photo. Filey requests a temporary signed download URL, downloads a local copy, and opens the system preview. Larger photos make the row's loading spinner easier to see.

Try the empty state

Inbox starts empty. Open it to check how the browser handles a folder with no files.

About this content

All document names, people, businesses, purchases, and reservations are fictional. Photos are real CC0 photographs; their authors and source pages are recorded in the repository's seed-assets README.

Practice ideas

Navigate several folders deep, return to the root, and open both portrait and landscape images. Open the itinerary and scroll to page two. Try previewing with the network disconnected, then retry after reconnecting.
